Allium by Ruth Moilliet has always been the artist's signature piece. It was never a conscious decision but it evolved this way. People identified with them readily and they have found their way into many private and public spaces, where life flows around them daily in whatever form that may take.

The Alliums vary in scale, form and colour, befitting of their ultimate location. Unique commissions are very much a key part of Ruth Moilliet Sculptures' output and the Allium sculpture can be created as a bespoke work to suit any setting.

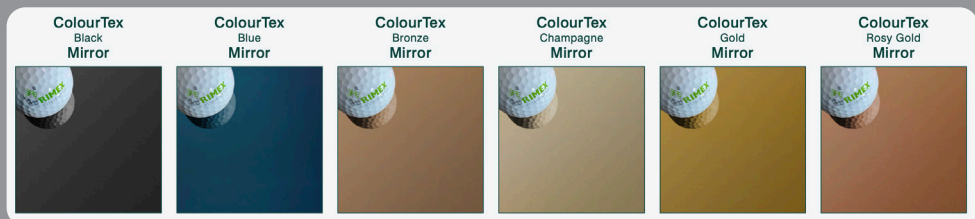

Sphere sizes available: 50cm, 75cm, 1m, 1.25m, 1.5m and 2m.

### Specification

The Allium sculpture is produced from high grade 316 stainless steel suitable for all external environments. The individual flowers have a mirror polish finish and are fixed to the stems with a dome headed bolt and thread lock resin. The strength and permanency of the resin can be chosen accordingly to allow for the removal and/or permanent fixing of the flowers.

The flowers can be produced in mirror polished silver which are one price range and in the mirror polish colours shown below which are another price range. If other colours are required these can be produced in anodised aluminium with a bright or matt finish.

Commissioned pieces can have a stem and base design made to suit, examples of this are below. The tripod base on a circular ring allows a light to be sited beneath the work if desired.

Choose a flower or combination of flowers from the Ruth Moilliet Pollination stem range to create a bespoke sphere of flowers.
